

Mercy Care Diabetes Prevention and Education Program referral form

The Mercy Care Diabetes Prevention and Education Program (DPEP) assists adult Mercy Care members who have been newly diagnosed with prediabetes or type 2 diabetes in the past 6 months. The program is designed to provide the skills, information and support needed to empower members to better manage their condition. Adopting and maintaining a healthy lifestyle is a proven way to reduce health risks related to type 2 diabetes, and for some people, preventing or delaying type 2 diabetes. Referred members will be contacted and assessed by the Mercy Care DPEP team.

Email this completed referral form to: acutecmreferral@mercycares.org.

Copy/paste this into the email subject line: **DPEP REFERRAL**

Member's name: _____ AHCCCS ID: _____ Date of birth: _____

Address: _____
